

PARTS & ACCESSORIES

Canopy Replacement Parts

Individual canopy spares and transport components selected by part and frame family, with compatibility checked against your actual hardware.

**WHAT YOU RECEIVE**

- The selected replacement component or named set
- Selected commercial steel or premium aluminum frame family
- Compatibility review before fulfillment

Selected options define your item. Scene props and other display products are separate.

Choose with confidence.

Identify the damaged or missing part before choosing a replacement. Frame family alone is not enough to establish fit across different sizes or production versions.

PART

Rope set / Ground stake set / Cross bar and clip / Tent and flag connector / Reinforced roller bag / Canopy carry bag

CANOPY REPLACEMENT PARTS

Ready for event day.

A practical overview. Use the instructions supplied with your exact product for locks, fittings, mounting, and any model specific procedure.

01 Identify the original frame

Record the frame model, overall size, material, and leg profile before choosing a replacement.

02 Measure the damaged part

Check its length, section size, hole spacing, and connector shape. Photograph the part and the surrounding connection.

03 Confirm compatibility

Match the supplied replacement to the original frame and revision. Similar looking parts are not necessarily interchangeable.

04 Unload the frame

Do not work on an occupied, raised, or tensioned canopy. Follow the original manufacturer's repair instructions.

05 Check the completed repair

Make sure the correct fasteners and connections are secure and all locks operate normally. Stop if anything binds or remains loose.

06 Keep a part record

Save the confirmed part identifier and frame details with your order for any future replacement.

CANOPY REPLACEMENT PARTS

Get the details right.

Compatibility	BoothBright pop up canopy systems
Confirmation	Frame model verified after order
Fulfillment	Made to order or stocked where available

Compatibility information

This is a hardware product. Compatibility photographs and measurements are more useful than an artwork file.

Confirm for your exact item

Frame manufacturer and revision, exact part dimensions, fastener specification, and approved repair procedure.
