

TRADE SHOW

Curved Tension Fabric Display

A curved fabric backdrop that gives an indoor booth depth, with a portable aluminum tube frame and a replaceable printed graphic.

**WHAT YOU RECEIVE**

- Curved aluminum tube frame
- Full color fabric graphic
- Carry bag

Selected options define your item. Scene props and other display products are separate.

Choose with confidence.

Choose a curved display to frame the center of your booth. Allow for its depth as well as its nominal width; a straight display is a different footprint.

SIZE

8 x 8 ft / 8 x 10 ft

CURVED TENSION FABRIC DISPLAY

Ready for event day.

A practical overview. Use the instructions supplied with your exact product for locks, fittings, mounting, and any model specific procedure.

01 Allow for the curve

Plan the assembled width and depth, including feet. A curved backdrop occupies a different footprint from a straight one.

02 Sort the frame

Lay out the matching curved tubes and connect them using the supplied model diagram. Do not substitute straight frame sections.

03 Secure the supports

Seat the frame connections and install its matching feet or supports before raising the display.

04 Fit the curved graphic

Use the graphic made for this exact curve and size. Work the fabric on evenly and align the seams before closing its fastening.

05 Check your floor plan

Keep visitor routes clear around the curved ends. Place the display indoors and manage any optional lighting cables.

06 Pack in separate layers

Remove the dry graphic, separate the frame, and protect the fabric from tube ends during transport.

CURVED TENSION FABRIC DISPLAY

Get the details right.

Display sizes	8 ft W x 8 ft H or 10 ft W x 8 ft H; selector labels list height first
Graphic	7.4 oz/yd ² knitted polyester (250 gsm)
Frame	Aluminum tube
Use	Indoor events and trade shows

Artwork that fits

Artwork wraps around a curve. Keep the main message near the center and review the assembled view as well as the flat layout.

Confirm for your exact item

Exact assembled width and depth, curve profile, tube layout, graphic tension allowance, and final print template.

Use the matched supplier template before preparing production files. A visual placement preview or layout reference does not establish final bleed, trim, seams, or safe areas.
