

EVENT SIGNAGE

Custom Barricade Covers

Printed covers that turn compatible pedestrian barricades into sponsor and wayfinding surfaces, available as a front panel or a fitted sleeve.

**WHAT YOU RECEIVE**

- One custom printed barricade cover
- Selected front panel or fitted sleeve construction
- Fit based on confirmed barricade measurements

Selected options define your item. Scene props and other display products are separate.

Choose with confidence.

A front panel presents one main face; a fitted sleeve wraps the compatible barrier. The steel barricade itself is separate unless specifically quoted.

COVER STYLE

Front panel cover / Fitted full sleeve

CUSTOM BARRICADE COVERS

Ready for event day.

A practical overview. Use the instructions supplied with your exact product for locks, fittings, mounting, and any model specific procedure.

01 Measure the actual barrier

Check the rail shape, width, height, feet, and any joining hardware. Nominal barrier names are not enough.

02 Match panel or sleeve

The front panel and full sleeve constructions fit differently. Use the cover made for the selected barrier arrangement.

03 Keep safety features visible

Do not cover required warnings or interfere with the barrier's joints, feet, or emergency access.

04 Attach through the intended points

Use the supplied or specified fastening arrangement. Avoid pulling fabric over projections that can tear it.

05 Review wind exposure

Adding a printed cover changes the surface exposed to wind. Have the barrier and attachment arrangement approved for the location.

06 Remove and store dry

Release attachments before moving the barrier. Dry the cover and protect its seams and fasteners in storage.

CUSTOM BARRICADE COVERS

Get the details right.

Use	Crowd control branding and sponsor visibility
Fit	Produced to the confirmed barricade dimensions
Graphic	Full color printed fabric
Hardware	Barricade not included unless quoted

Artwork that fits

Prepare the front panel or full sleeve for the exact barrier. Check wrap ends, attachment zones, rail clearances, and which faces are visible.

Confirm for your exact item

Actual barrier model and dimensions, cover construction, attachment points, wind management, and the supplier pattern.

Use the matched supplier template before preparing production files. A visual placement preview or layout reference does not establish final bleed, trim, seams, or safe areas.
