

EVENT SIGNAGE

Custom Mesh Fence Banners

Perforated event fence graphics with reinforced hems and grommets, built around a selected finished width and height.

**WHAT YOU RECEIVE**

- One full color perforated mesh banner
- Selected finished size
- Reinforced perimeter hem and metal grommets

Selected options define your item. Scene props and other display products are separate.

Choose with confidence.

Choose mesh when airflow through the graphic is useful. Check fence ownership, mounting points, and the required clearances before deciding on the full banner size.

FINISHED SIZE

8 x 3 ft / 12 x 4 ft

CUSTOM MESH FENCE BANNERS

Ready for event day.

A practical overview. Use the instructions supplied with your exact product for locks, fittings, mounting, and any model specific procedure.

01 Measure the fence area

Confirm the selected banner width and height plus clearance around gates and access points.

02 Check the support

The fence and its foundations must be suitable for the added banner and local conditions.

03 Inspect the finish

Check reinforced edges and intended attachment points before installation.

04 Distribute attachments

Use compatible fasteners through the intended finished points. Avoid excessive tension at a single corner.

05 Monitor the weather

Mesh allows some airflow but does not eliminate wind load. Remove the banner before unsafe conditions.

06 Roll when dry

Clean according to the supplied material instructions, dry fully, and roll without sharp creases for storage.

CUSTOM MESH FENCE BANNERS

Get the details right.

Material	Outdoor perforated mesh
Finishing	Reinforced hem and grommets
Use	Temporary event fences and perimeter branding
Printing	Full color custom graphic

Artwork that fits

Use bold text and clear contrast for viewing through the perforated material. Keep important artwork away from the confirmed hems and eyelets.

Confirm for your exact item

Mesh specification, finished dimensions, attachment spacing, fence suitability, and final bleed and hem allowances.

Use the matched supplier template before preparing production files. A visual placement preview or layout reference does not establish final bleed, trim, seams, or safe areas.
