

FLAGS

Custom Pennant Flags

Printed satin pennants on a continuous line, with triangle, rectangle, or swallowtail shapes for event routes and overhead decoration.

**WHAT YOU RECEIVE**

- Selected length of printed pennant line
- Selected pennant shape
- Continuous line with repeated graphics

Selected options define your item. Scene props and other display products are separate.

Choose with confidence.

Choose the full run length before deciding on spacing. Plan mounting points and hanging clearance; individual pennant dimensions and spacing need to fit the final run.

RUN LENGTH

32 ft / 65 ft / 98 ft

CUSTOM PENNANT FLAGS

Ready for event day.

A practical overview. Use the instructions supplied with your exact product for locks, fittings, mounting, and any model specific procedure.

01 Plan the run

Measure the route and clearance before deciding how many pennants or what string arrangement you need.

02 Check each shape

Triangle, rectangle, and swallowtail pennants have different printable outlines. Match the ordered shape.

03 Inspect the attachment

Check the supplied string or finishing and confirm suitable anchor points at the display location.

04 Hang without excessive tension

Support the run using the intended attachment arrangement. Do not pull the flags apart or use the fabric as a load bearing strap.

05 Keep the route clear

Avoid placing strings across walkways or at head height. Follow venue restrictions for decorations.

06 Pack without tangles

Dry the pennants, gather the string carefully, and keep sharp objects away from the printed fabric.

CUSTOM PENNANT FLAGS

Get the details right.

Material	Satin
Printing	Full color
Use	Event decoration and overhead branding

Artwork that fits

Repeat the approved design at the correct orientation on every pennant. Keep critical details clear of the cut point and attached edge.

Confirm for your exact item

Finished pennant outline, actual count, string length, spacing, attachment method, and final template.

Use the matched supplier template before preparing production files. A visual placement preview or layout reference does not establish final bleed, trim, seams, or safe areas.
