

PARTS & ACCESSORIES

Flag Bases and Mounts

Flag supports and mounting accessories for soil, hard surfaces, walls, and parked vehicle installations, selected to match the pole connection.

**WHAT YOU RECEIVE**

- The selected base, mount, weight, or carry bag
- Compatibility review for the intended pole

Selected options define your item. Scene props and other display products are separate.

Choose with confidence.

Start with the installation surface, then confirm the pole and connector. A water bag is added ballast for compatible hardware, not a flag stand by itself.

BASE

Ground spike / Ground screw / Black cross base / Water bag weight / Heavy black base / Wall base / Black folding tire base / Silver curved tire base / Flag pole carry bag

FLAG BASES AND MOUNTS

Ready for event day.

A practical overview. Use the instructions supplied with your exact product for locks, fittings, mounting, and any model specific procedure.

01 Identify your flag pole

Record the pole model, lower diameter, and connection type before choosing a base or mount.

02 Choose for the surface

Ground spikes and screws, cross bases, plates, wall mounts, and tire mounts serve different locations.

03 Check compatibility

Confirm the base connection and any bearing or adapter. A water bag is a weight accessory, not a complete flag base.

04 Install as specified

Use the intended anchors and weighting method. Wall or tire installations require the exact mounting instructions and a suitable support.

05 Protect the public area

Keep the full base footprint and flag movement clear of routes and vehicles. Do not assume a mount is approved for a moving vehicle.

06 Inspect before reuse

Check for loose fasteners, damage, and wear. Empty compatible weight bags for transport and protect pointed fittings.

FLAG BASES AND MOUNTS

Get the details right.

Surfaces	Pavement, turf, soil, wall, or tire mount
Finish	Black or zinc plated by model
Compatibility	Confirmed before fulfillment

Compatibility information

No custom print layout is required. Keep pole measurements, base photographs, and the selected mounting option with the order.

Confirm for your exact item

Pole connection, bearing or adapter, anchoring, required ballast, surface suitability, and permitted mount use.
