

**BANNERS**

# Pop Up A Frame

One folding display with two printed faces, available in five shapes for sponsor zones, event directions, and temporary promotions.

**WHAT YOU RECEIVE**

- Selected quantity of complete folding displays
- Two printed faces per display
- Spring steel frame and carry bag

Selected options define your item. Scene props and other display products are separate.

## Choose with confidence.

Choose the shape for the space and message, then the number of complete displays. Horizontal, vertical, circle, triangle, and compact formats have different silhouettes.

**SHAPE**

Horizontal / Vertical / Circle / Triangle / 39.4 x 39.4 in compact

## POP UP A FRAME

# Ready for event day.

A practical overview. Use the instructions supplied with your exact product for locks, fittings, mounting, and any model specific procedure.

**01 Check the selected shape**

Horizontal, vertical, circle, triangle, and compact frames use different outlines. Match the supplied graphic and frame.

**02 Clear the opening area**

The spring frame stores tension. Keep faces, fingers, children, and nearby objects clear while opening it under control.

**03 Open one complete unit**

Unfold the display according to its supplied instructions. The two printed faces belong to one connected folding unit.

**04 Set the support correctly**

Use the supplied connector, strap, or stabilizing arrangement for that model. Do not improvise its opening angle or attachments.

**05 Secure the location**

Use only compatible anchors for the ground and display. Keep anchors and the full frame out of visitor routes.

**06 Fold using the exact method**

Follow the folding sequence supplied for that shape. Do not force the spring frame or copy the folding motion for a different product.

## Artwork that fits

Prepare one readable design for each face. Use the exact selected outline and preserve important content away from the frame channel and finished edge.

### Confirm for your exact item

Spring frame folding method, connection between faces, anchoring hardware, and the template for the exact shape.

Use the matched supplier template before preparing production files. A visual placement preview or layout reference does not establish final bleed, trim, seams, or safe areas.
