

TRADE SHOW

Portable Promotion Counter

A branded working surface for check in, sampling, and demonstrations, with curved fabric or foldable hard shell construction.

**WHAT YOU RECEIVE**

- Selected portable counter structure
- White countertop
- Printed customer facing graphic and protective transport packing

Selected options define your item. Scene props and other display products are separate.

Choose with confidence.

The curved fabric and foldable hard shell counters are different constructions. Choose the one that suits your event setup and confirm physical dimensions for a tight floor plan.

COUNTER STYLE

Curved fabric counter / Foldable hard shell counter

PORTABLE PROMOTION COUNTER

Ready for event day.

A practical overview. Use the instructions supplied with your exact product for locks, fittings, mounting, and any model specific procedure.

01 Check the selected construction

The curved fabric counter and foldable hard shell counter use different structures and graphic patterns.

02 Identify the components

Match the base, countertop, supports, and graphic to the assembly instructions for the supplied counter.

03 Build on a level surface

Assemble the support before adding the countertop. Do not force locks or substitute parts from another style.

04 Fit the correct graphic

Align the print with the front and any wrap edges. Close the intended fastening without stretching a mismatched graphic.

05 Respect its capacity

Confirm the model's load limit before placing equipment on the counter. Do not sit, stand, or lean heavily on the countertop.

06 Pack in the correct order

Remove loose objects and the graphic as instructed. Separate the countertop and supports and protect the printed surfaces.

PORTABLE PROMOTION COUNTER

Get the details right.

Use	Check in, sampling, demos, and lead capture
Graphic	Full color custom front surface
Countertop	White reusable top
Packing	Portable components with protective packing

Artwork that fits

A curved fabric wrap and a hard shell panel have different proportions and joins. The final template must match the selected construction.

Confirm for your exact item

Exact counter model, dimensions, load limit, assembly sequence, graphic attachment, and panel template.

Use the matched supplier template before preparing production files. A visual placement preview or layout reference does not establish final bleed, trim, seams, or safe areas.
