

BANNERS

X Banner Stand

A lightweight glass fiber stand that holds a printed graphic at its corners, ideal for indoor directions and short event promotions.

**WHAT YOU RECEIVE**

- Selected quantity of X stands
- Matching full color PP paper graphics
- Oxford carry bags

Selected options define your item. Scene props and other display products are separate.

Choose with confidence.

Choose the graphic size, then the number of complete stands. The X frame is a different construction from a retractable banner and does not have a roll up base.

GRAPHIC

23.6 x 63 in / 31.5 x 70.9 in

X BANNER STAND

Ready for event day.

A practical overview. Use the instructions supplied with your exact product for locks, fittings, mounting, and any model specific procedure.

01 Check the graphic size

Use a graphic with the correct dimensions and corner eyelet positions for the selected X stand.

02 Inspect the support

Check the hub, arms, hooks, and supporting leg. Do not use cracked fiberglass or damaged fittings.

03 Open the frame

Assemble the matching arms in the supplied hub and position the supporting leg according to the model instructions.

04 Attach the eyelets

Connect the graphic corners to the hooks gradually and evenly. Avoid stretching a corner eyelet over an incompatible frame.

05 Check the balance

Set the display on an even indoor surface and keep its rear leg clear of visitor routes.

06 Release and pack

Support the graphic while releasing tension from the hooks. Roll the graphic and protect it from the stand's pointed fittings.

X BANNER STAND

Get the details right.

Sizes	23.6 x 63 in or 31.5 x 70.9 in
Net weight	1.8 lb (0.8 kg)
Frame	Glass fiber
Graphic material	PP paper
Packing	Oxford carry bag

Artwork that fits

Allow for corner eyelets and any reinforced edge. Match the approved width, height, and hole positions to the stand.

Confirm for your exact item

Exact frame dimensions, hook positions, supported graphic material, and finishing allowances.

Use the matched supplier template before preparing production files. A visual placement preview or layout reference does not establish final bleed, trim, seams, or safe areas.
